Honey, and **foods that contain honey**, should never be fed to babies less than 1 year of age. Honey may contain substances that can cause “infant botulism,” a serious type of food related illness that can make a baby very sick. Honey should not be added to food, water, or formula that is fed to babies, or used as an ingredient in cooking or baking (e.g., yogurt with honey, entrées and baked goods that contain honey). This also applies to commercially prepared foods such as cereals sweetened with honey or honey graham crackers.
